

XJTLU Entrepreneur College (Taicang)

Module Code and Title	ENT208TC Industry Readiness
School Title	XJTLU Entrepreneur College (Taicang)
Assignment Title	Project Brief
Submission Deadline	Friday March 27, 2026 before 23:59 (Beijing Time, GMT+8)
Session and Group	Session 2 — Group 8
Student IDs	2360724, 2362966, 2360759, 2361273, 2255187, 2362906, 2362677
Final Word Count	
If you agree to let the university use your work anonymously for teaching and learning purposes, please type “yes” here.	Yes

I certify that I have read and understood the University's Policy for dealing with Plagiarism, Collusion, and the Fabrication of Data (available on Learning Mall Online). With reference to this policy, I certify that:

- My work does not contain any instances of plagiarism and/or collusion. My work does not contain any fabricated data.

By uploading my assignment onto Learning Mall Online, I formally declare that all of the above information is true to the best of my knowledge and belief.

Student ID	Scoring — For Tutor Use						
	2360724, 2362966, 2360759, 2361273, 2255187, 2362906, 2362677						
Stage of Marking	Marker Code	Learning Outcomes Achieved (F/P/M/D)					Final Score
		A	B	C	D	E	
1st Marker — red pen							
Moderation — green pen	IM Initials	The original mark has been accepted by the moderator: Y / N					Y / N
2nd Marker if needed

Section 1 — The Problem

Rising loneliness affects many office workers and international students daily. Office staff often work long hours alone with limited in-person interaction, leading to emotional numbness and reduced well-being. International students living abroad frequently feel isolated due to distance from family, cultural gaps and busy study schedules. Current solutions include keeping real pets (time-consuming, restricted in dorms/offices), social media (superficial connection) and static virtual apps (no physical feedback). These options fail to deliver instant, low-effort, warm emotional companionship. The problem is highly frequent and negatively impacts mental state, work efficiency and daily mood for a large group of young people.

Section 2 — Target Users

We build for lonely office workers and international students aged 20–35. Typical users include a 23-year-old overseas student busy with coursework who feels homesick and empty at weekends, and a 29-year-old office clerk who sits alone for hours and lacks a casual emotional outlet. They want gentle, zero-burden companionship. Existing products either need heavy maintenance, are banned in dorms/offices, or offer no real physical interaction, leaving their core need for immediate warm companionship unmet.

Section 3 — The Solution

We create a portable interactive electronic pet that delivers instant, low-responsibility emotional companionship for lonely office workers and international students. It reacts to user gestures, sound and surrounding conditions in real time, provides gentle feedback and eases loneliness without extra time or care cost. It directly solves the lack of instant, warm, low-fuss companionship by combining responsive interaction, environmental awareness, remote control and voice communication, fitting naturally into daily work and study routines.

Key Features

- Multi-sensor driven expression interaction to touch, shake, tilt and loud sound
- Real-time display of temperature, humidity, local time and weather
- Mobile scanning to remotely control expressions via a web page
- One-key entry to voice interaction mode for emotional communication
- Automatic looped idle animations when waiting for user interaction

Section 4 — Success Metrics

- 90% of test users complete core interactive tasks within 1 minute
- 80% of users use the product at least 3 times daily and keep using it for 7+ days
- Sensor response delay $\leq 0.5s$ and interaction accuracy $\geq 95\%$ in testing
- Voice interaction recognition success rate reaches over 90%
- 90% of users report reduced loneliness after using the product
